MHI

MODIFIED HAIR IMPLANTATION

MHI is the latest, unique, Advanced Hair Implant system which is a combination of Advanced Hair Transplant, Platelet Rich Plasma (PRP) Therapy along with addition of patented specific growth factor which gives boost to existing hairs and ensures the growth of newly implanted hair to ensure uniform growth for excellent result.

ADVANTAGES OF MODIFIED HAIR IMPLANTATION (MHI)

- ✔ No cut
- ✔ No pain
- ✔ Less invasive
- ✔ Less handling of the graft
- ✔ No stitches
- ✔ No bleeding
- ✔ Less traumatic
- ✔ Increased graft survival
- ✔ No scalpels
- ✔ Invisible scarring
- ✔ Quick recovery

MHI

PRINCIPLES

UNIQUE FEATURES OF MHI

Preparation of recipient area with patented VGROW medicines prior surgery.

Special VIBRAJET technique for anesthesia for a painless experience.

Prior implantation, RECOMBINANT growth factor treatment on the scalp to fertilize the area.

Processing of extracted graft with EPRP solution to improve graft survival.

The precision of transplanters to control DEPTH/ANGLE/DIRECTION.

Maximum surgeon's involvement for Proper Assessment of hairline/density/distribution and assured safety.

ERTIP FINE PUNCHES WITH COLLAGEN DRESSING for quick healing of the donor area.

MAXIMUM GRAFTS for more density.

Specially designed VGROW POST-OPERATIVE MAINTENANCE TREATMENT for implanted & existing hair.

5 SESSIONS OF EPRP to assure great results.
